Literature Search Summary

Of the 75 citations in the original bibliography, 26 were retained in the final document.

A literature search was conducted in March 2015 and June 2017 to identify additional evidence published since the ACR Appropriateness Criteria® Imaging for Transcatheter Aortic Valve Replacement topic was finalized. Using the search strategies described above, 578 articles were found. Four articles were added to the bibliography. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 16 citations from bibliographies, websites, or books that were not found in the literature searches.

Two citations are supporting documents that were added by staff.
