Literature Search Summary

A literature search was conducted in December 2015 to identify evidence for the *ACR Appropriateness Criteria*[®] *Assessment of Fetal Well Being* topic. Using the search strategy described above, 8,734 articles were found. Fifty seven articles were used in the topic. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 17 citations from bibliographies, websites, or books that were not found in the literature search, including eight articles that were classic studies outside of the search date range.
