Literature Search Summary

A literature search was conducted in June 2015 and updated in June 2017 to identify evidence for the ACR Appropriateness Criteria® Radiologic Management of Central Venous Access topic. Using the search strategies described above, 612 articles were found. Twenty-five articles were used in the topic. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 127 citations from bibliographies, websites, or books that were not found in the literature searches, including 72 articles outside of the search date ranges.
