Literature Search Summary

A literature search was conducted in June 2014, March 2015, and December 2016 to identify evidence for the ACR Appropriateness Criteria® Imaging After Shoulder Arthroplasty topic. Using the search strategy described above, 4,195 articles were found. Fifty-four articles were added to the bibliography. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 12 citations from bibliographies, websites, or books that were not found in the literature search.
