Literature Search Summary

A literature search was conducted in March 2015 and updated in May 2016 to identify evidence for the ACR Appropriateness Criteria® Imaging of Possible Tuberculosis topic. Using the search strategies described above, 420 articles were found. Eighteen articles were used in the topic. The remaining articles were not used due to
either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear, misinterpreted, or biased.

The author added 4 citations from bibliographies, websites, or books that were not found in the literature search.
