Literature Search Summary

A literature search was conducted in March 2015 and updated in July 2015 and October 2016 to identify evidence for the ACR Appropriateness Criteria® Evaluation of Nipple Discharge topic. Using the search strategies described above, 8584 articles were found. Forty-five articles were used in the topic. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 27 citations from bibliographies, websites, or books that were not found in the literature searches, including 18 articles outside of the search date ranges.

One citation is a supporting document that was added by staff.
