Literature Search Summary

A literature search was conducted in February 2015 and June 2017 to identify evidence for the ACR Appropriateness Criteria® Breast Implant Evaluation topic. Using the search strategies described above, 116 articles were found. Thirty unique articles were used in the topic. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

Two citations are supporting documents that were added by staff.
