Search Strategy:
A literature search was conducted in June 2015 and June 2017 to identify evidence for the ACR Appropriateness Criteria® Shoulder Pain-Atraumatic topic. Using the search strategies described above, 1,062 articles were found. Twelve unique articles were used in the topic. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 88 citations from bibliographies, websites, or books that were not found in the literature searches, including 50 articles outside of the search date ranges.

Two citations are supporting documents that were added by staff.
