**Literature Search Summary**

Literature searches were conducted in July 2015 and August 2017 to identify evidence for the ACR Appropriateness Criteria® Lower Extremity Arterial Revascularization–Post-Therapy Imaging topic. Using the search strategy described above, 532 articles were found. Fifty-nine articles were used in the topic. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear, misinterpreted, or biased.

The author added 29 citations from bibliographies, websites, or books that were not found in the literature search, including 26 articles outside of the search date ranges.

One citation is a supporting document that was added by staff.
