Literature Search Summary

Literature searches were conducted in March 2015 and August 2017 to identify evidence for the ACR Appropriateness Criteria® Suspected Thoracic Aortic Aneurysm topic. Using the search strategies described above, 700 articles were found. Six articles were used in the topic. One article was not used as it was a duplicate captured in more than one literature search. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 40 citations from bibliographies, websites, or books that were not found in the literature searches, including 22 articles outside of the search date ranges.

Four supporting document citations were added by staff.
