Summary
Of the 0 citations in the original bibliography, 0 were retained in the final document.
A literature search was conducted in February 2017 to identify additional evidence published since the ACR Appropriateness Criteria® Lung Cancer Screening topic was finalized. Using the search strategy described above, 565 articles were found. 35 articles were added to the bibliography. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.
The author added 5 citations from bibliographies, websites, or books that were not found in the literature searches.
2 citations are supporting documents were added by staff.
