Literature Search Summary

A literature search was conducted in January 2017 to identify evidence for the ACR Appropriateness Criteria® Postmenopausal Subacute or Chronic Pelvic Pain topic. Using the search strategy described above, 170 articles were found. Twenty-five unique articles were used in the topic. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 11 citations from bibliographies, websites, or books that were not found in the literature search, including 3 articles outside of the search date range.

Two citations are supporting documents that were added by staff.
