Literature Search Summary

Of the 75 citations in the original bibliography, 51 were retained in the final document.

A literature search was conducted in March 2015, and updated on April 2017 to identify additional evidence published since the ACR Appropriateness Criteria® Acutely Limping Child Up To Age 5 topic was finalized. Using the search strategies described above, 86 unique articles were found. Nine articles were added to the bibliography. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 16 citations from bibliographies, websites, or books that were not found in the literature search, including 9 articles outside of the search date ranges.

Two citations are supporting documents that were added by staff.
