Literature Search Summary

Of the 103 citations in the original bibliography, 41 were retained in the final document.

A literature search was conducted in May 2015, July 2016, and June 2017 to identify additional evidence published since the ACR Appropriateness Criteria® Pretreatment Staging of Muscle-Invasive Bladder Cancer topic was finalized. Using the search strategies described above, 92 unique articles were found. Twenty articles were added to the bibliography. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 13 citations from bibliographies, websites, or books that were not found in the literature searches, including 1 article outside of the search date ranges.

Three citations are supporting documents that were added by staff.
