- pet.mp. (66742)
- 7 and (11 or 12 or 13) (2174)
Literature Search Summary

Of the 66 citations in the original bibliography, 62 were retained in the final document.

A literature search was conducted in December 2017 and February 2016 to identify additional evidence published since the ACR Appropriateness Criteria® Staging and Follow-up of Ovarian Cancer topic was finalized. Using the search strategies described above, 735 unique articles were found. 12 articles were added to the bibliography. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 18 citations from bibliographies, websites, or books that were not found in the literature searches, including 7 articles outside of the search date ranges.

Four citations are supporting documents that were added by staff.
