Literature Search Summary

Of the 89 citations in the original bibliography, 57 were retained in the final document.

A literature search was conducted in July 2013, June 2015, May 2016, and June 2016 to identify additional evidence published since the *ACR Appropriateness Criteria® Chronic Hip Pain* topic was finalized. Using the search strategies described above, 4883 articles were found. Thirty-five articles were added to the bibliography. One thousand four hundred ninety-two articles were not used as they were duplicates already cited in the original bibliography or captured in more than one literature search. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 9 citations from bibliographies, websites, or books that were not found in the literature searches.

Five citations are supporting documents that were added by staff.
