Literature Search Summary

Of the 91 citations in the original bibliography, 53 were retained in the final document.

A literature search was conducted in April 2015 and June 2017 to identify additional evidence published since the ACR Appropriateness Criteria® Chronic Wrist Pain topic was finalized. Using the search strategies described above, 410 articles were found. Ten articles were added to the bibliography. Two articles were not used as they were duplicates already cited in the original bibliography or captured in more than one literature search. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 5 citations from bibliographies, websites, or books that were not found in the literature searches. Three citations are supporting documents that were added by staff.
