Literature Search Summary

Of the 30 citations in the original bibliography, 0 were retained in the final document.

A literature search was conducted in December 2015, March 2017, April 2017, and July 2017 to identify additional evidence published since the ACR Appropriateness Criteria® Shoulder Pain-Traumatic topic was finalized. Using the search strategies described above, 1,193 unique articles were found. Seventy-eight articles were added to the bibliography. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 11 citations from bibliographies, websites, or books that were not found in the literature searches.

One citation is a supporting document that was added by staff.
