Literature Search Summary

Of the 30 citations in the original bibliography, 10 were retained in the final document.

A literature search was conducted in May 2015, March 2016, and July 2017 to identify additional evidence published since the ACR Appropriateness Criteria® Soft-Tissue Masses topic was finalized. Using the search strategies described above, 7,222 unique articles were found. Twenty-four articles were added to the bibliography. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 6 citations from bibliographies, websites, or books that were not found in the literature searches.

Three citations are supporting documents that were added by staff.
