29     30 or 29 (201)
30     31 remove duplicates from 30 (195)

Literature Search Summary

Of the 19 citations in the original bibliography, 14 were retained in the final document.

A literature search was conducted in August 2016 to identify additional evidence published since the ACR Appropriateness Criteria® Acute Respiratory Illness in Immunocompetent Patients topic was finalized. Using the search strategy described above, 195 unique articles were found. Eleven articles were added to the bibliography. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 14 citations from bibliographies, websites, or books that were not found in the literature search, including 9 articles outside of the search date range.

Two citations are supporting documents that were added by staff.
