14    9 and 13 (272)
15    10 or 12 or 14 (915)
Literature Search Summary

Of the 37 citations in the original bibliography, 24 were retained in the final document.

A literature search was conducted in April 2015 and updated on June 2017 to identify additional evidence published since the ACR Appropriateness Criteria® Ovarian Cancer Screening topic was finalized. Using the search strategy described above, 239 articles were found. Four articles were added to the bibliography. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 8 citations from bibliographies, websites, or books that were not found in the literature search, including 5 articles outside of the search date range.

One citation is a supporting document that was added by staff.
