Literature Search Summary

Of the 96 citations in the original bibliography, 47 were retained in the final document.

A literature search was conducted in May 2016, to identify additional evidence published since the ACR Appropriateness Criteria® Acute Nonlocalized Abdominal Pain topic was finalized. Using the search strategy described above, 204 unique articles were found. 32 articles were added to the bibliography. The remaining articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, or the results were unclear or biased.

The author added 10 citations from bibliographies, websites, or books that were not found in the literature search, including 8 articles outside of the search date range.

7 citations are supporting documents that were added by staff.
