Literature Search

ACR Appropriateness Criteria®
Crohn Disease

Literature Search Performed on: 8/29/2013
Beginning date: January 2010
End date: July 2013

Database: Ovid MEDLINE(R), Ovid MEDLINE(R) In-Process & Other Non-Indexed Citations, Ovid MEDLINE(R) Daily and Ovid OLDMEDLINE(R) <1946 to Present>

Search Strategy:

1. exp Diagnostic Imaging/ (1729566)
2. *Crohn Disease/ (23947)
3. 1 and 2 (1799)
4. limit 3 to (abstracts and english language and humans and yr="2010 -Current") (352)
5. limit 4 to case reports (56)
6. 4 not 5 (296)
7. remove duplicates from 6 (251)

Notes:
exp = explode (retrieves results using the selected term and all of its more specific terms)
* = focus (limits search to those documents in which the subject heading is considered the major point of the article)

Literature Search Summary

Of the 117 citations in the original bibliography, 71 were retained in the final document. Articles were removed from the original bibliography if they were more than 10 years old and did not contribute to the evidence or they were no longer cited in the revised narrative text.

A new literature search was conducted in August 2013 to identify additional evidence published since the ACR Appropriateness Criteria® Crohn Disease topic was finalized. Using the search strategy described above, 251 articles were found. Thirteen articles were added to the bibliography. Two hundred thirty-eight articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, the results were unclear, misinterpreted, or biased, or the articles were already cited in the original bibliography.

The author added 56 citations from bibliographies, websites, or books that were not found in the new literature search.
