Literature Search
ACR Appropriateness Criteria®
Stage 1 Breast Cancer: Initial Workup and Surveillance for Local Recurrence and Distant Metastases in Asymptomatic Women

Literature Search Performed on: 07/14/2015
Beginning Date: January 2009
End Date: June 2015

Database: Ovid MEDLINE(R) In-Process & Other Non-Indexed Citations, Ovid MEDLINE(R) Daily, Ovid MEDLINE(R) and Ovid OLDMEDLINE(R) <1946 to Present>

Search Strategy:
--------------------------------------------------------------------------------
1     3D mammography.mp. (14)
2     tomosynthesis.m_titl. (608)
3     Breast Neoplasms/ or Breast/ (247021)
4     (1 or 2) and 3 (256)
5     limit 2 to "all child (0 to 18 years)" (11)
6     4 not 5 (255)
7     limit 6 to (abstracts and english language and humans and yr="2009 -Current") (181)
8     limit 7 to case reports (3)
9     7 not 8 (178)
10     remove duplicates from 9 (161)

Notes:
.mp = multi-purpose (retrieves results that have this keyword in several fields)

Literature Search Summary

Of the 60 citations in the original bibliography, 59 were retained in the final document. Articles were removed from the original bibliography if they were more than 10 years old and did not contribute to the evidence or they were no longer cited in the revised narrative text.

A new literature search was conducted in July 2015 to identify additional evidence published since the ACR Appropriateness Criteria® Stage 1 Breast Cancer topic was finalized. Using the search strategies described above, 161 articles were found. Nine articles were added to the bibliography. One hundred fifty-two articles were not used due to either poor study design, the articles were not relevant or generalizable to the topic, the results were unclear, misinterpreted, or biased, or the articles were already cited in the original bibliography.
